EDUCATION

PhD, Economics. University of Southern California. Expected in 2013
MPhil, Economics. Cambridge University. 2002.
Graduate Diploma, Economics. Cambridge University. 2001.
BA, Computer Science, University of California at Berkeley. 1996

DISSERTATION

Essays on Religion, Social Interactions, and Cooperation
Committee: Professor John Strauss (chair), Professor Juan Carrillo, Professor Jeffrey Nugent.

FIELDS OF SPECIALIZATION

Primary: Development Microeconomics, Experimental Economics.
Secondary: Program Evaluation, Social Networks.

SCHOLARSHIPS, FELLOWSHIPS AND AWARDS

2012	Student Fellow, Association for Analytical Learning about Islam and Muslim Societies.
2012-2013	USC Graduate School Dissertation Completion Fellowship.
2011-2012	Advanced Fellowship, USC Department of Economics.
2011	Summer Research Fellowship, USC Department of Economics.
2010	Best Third-Year Paper Award, USC Department of Economics.
2010-2011	Wallis Annenberg Fellowship for Research on Women and Family ($25,000).
2010-2012	American-Indonesian Cultural and Education Foundation Fellowship.
2007-2009	USC Teaching Assistant Awards.
2008-2009	Honorary mention for Teaching Excellence, USC Department of Economics
2002	Citibank Cambridge Scholarship.
2001	British Chevening Award.
1998	Visiting Fellow, Australian National University, Canberra.
1993	Student Achievement Award, De Anza College.

TEACHING EXPERIENCE

Teaching assistant

Evaluating social programs. MIT-JPAL/World Bank Jakarta Summer Course. (June 2008)
Economics of less developed countries. (Fall 2009)
Economic development of the Middle East. USC. (Fall 2009)
Economic policy issues. USC. (Spring 2009)
Principles of microeconomics. USC. (Fall 2007, Spring & Fall 2008, Spring 2010)
Principles of macroeconomics. USC. (Fall 2009, Spring 2010)

Lecturer

Managerial Economics. Prasetiya Mulya Graduate School of Management, Jakarta. (Sep 2003 – May 2004)
Economics training for policy makers. Institute for Economics and Social Research. Faculty of Economics, University of Indonesia. *Occasional appointment*. (2005-2007)

RESEARCH AND WORK EXPERIENCE

Monitoring and evaluation consultant. *Social Development. World Bank, Jakarta Office, Jakarta* (2004 – 2012).
Research Assistant. *Indonesian Family Life Survey.* (Summer 2008).
Freelance author, Economist Intelligence Unit, Ltd., London (Oct 2006 – Jan 2007).
Research economist, Centre for Strategic and International Studies, Jakarta (Feb 1997 – Jul 2007).

JOB MARKET PAPER

"Uniter or Divider? Religion and social cooperation: Evidence from Indonesia".

This study empirically investigates how religion correlates with different aspects of trust, inter-group discrimination and tolerance in Indonesia. Using the latest round of the Indonesian Family Life Survey combined with population and village census datasets, I examine how individual religiosity and the community's religious composition correlate with attitudes. Rich individual-level variables improves on the identification of the individual religion effects on attitudes over previous studies. Moreover, this study contributes to the literature on the link between community heterogeneity and trust by highlighting the heterogeneous effects of diversity on intra- and inter-group trust, and providing empirical evidence on the important role of segregation on the propensity to cooperate.

I find religiosity to be positively associated with particularized trust and in-group preference, and negatively with religious tolerance. The strengths of the associations between measures of in-group preference and individual religiosity are much stronger than those from gender, education, or per-capita expenditure, particularly among Muslims who are the dominant majority. These associations are robust to various identification strategies. Using selection on observables to benchmark the potential bias from selection on unobservables, I find that the selection on unobservables need to be at least three times that on observables to explain away these results.

Meanwhile, individuals are more cooperative and trusting of their community members in more religiously homogeneous communities. At the same time – and in support of the optimal contact hypothesis of Gordon Allport (1954) – individuals in more homogeneous communities to be more discriminative against and less tolerant of members of the religious out-groups. Importantly, segregation matters and its omission can bias the coefficient on diversity. Its coefficients are often significant and their signs are often opposite those of religious diversity.

WORKING PAPERS

"The strategic formation of networks: Experimental evidence". July 2012. (previous version: CEPR DP 8757). (with Juan Carrillo)

We use a laboratory experiment to test a model of network formation where each link is formed through the bilateral agreement of the linked participants. We test whether the dynamic process of link creation and destruction given this particular link formation rule will converge to the pairwise-stable (PWS) network as predicted by the economic theory. The analysis of network outcomes suggests that the process converges to the PWS network when a PWS network exists and not to converge to any net-work when a PWS network does not exist. When multiple Pareto-rankable PWS networks exist, subjects coordinate on the high-payoff one. The analysis at the single choice level indicates that the percentage of myopically rational behavior is high. Deviations from myopic rationality are more prevalent in early turns, when marginal payoff losses are small and when deviations involve excessive links that may be removed unilaterally later on.

"Improving education quality through enchanced community participation: Results from a randomised field experiment in Indonesia". 2011. World Bank WPS 5795. (with Menno Pradhan, Daniel Suryadarma, Amanda Beatty, Rima Artha, and Maisy Wong)
