ARYA GADUH | USC Dept. of Economics (KAP 300) • 3620 S. Vermont Ave • Los Angeles, CA 90089-0253
Cell: 213.235.6520 | Fax: 213.740.8543 | gaduh@usc.edu | http://www-scf.usc.edu/~gaduh/

EDUCATION

Ph.D., Economics. University of Southern California. Expected in 2013
M.Phil., Economics. Cambridge University. 2002.
Graduate Diploma, Economics. Cambridge University. 2001.
B.A., Computer Science, University of California at Berkeley. 1996

FIELDS OF SPECIALIZATION

Primary: Development Microeconomics, Experimental Economics.
Secondary: Program Evaluation, Networks.

DISSERTATION

Essays on Religion, Social Interactions, and Cooperation
Committee: Professor John Strauss (chair), Professor Juan Carrillo, Professor Jeffrey Nugent.

WORKING PAPERS

"Uniter or Divider? Religion and social cooperation". *Job market paper.*
"The strategic formation of networks: Experimental evidence". 2012. CEPR Discussion Paper DP 8757. (with Juan Carrillo)
"Improving education quality through enchanced community participation: Results from a randomised field experiment in Indonesia". 2011. World Bank Working Paper WPS 5795. (with Menno Pradhan, Daniel Suryadarma, Amanda Beatty, Rima Artha, and Maisy Wong)
"Integration and Trade Specialization in East Asia". 2006. CSIS Working Paper WPE 094. (with Yose Damuri and Raymond Atje)
"Properties of Fixed Effects Dynamic Panel Data Estimators for a Typical Growth Dataset". 2002. CSIS Working Paper WPE 062.
"Information and Social Networks in Village Economies". CSIS Working Paper WPE 063. 2002.
"Indonesia-China Economic Relations: An Indonesian Perspective". 1999. CSIS Working Paper WPE 052. (with Raymond Atje)

ONGOING RESEARCH

"Ethnic composition, social capital, and the impact of transmigration in Indonesia" (with Samuel Bazzi, Alexander Rothenberg, and Maisy Wong).
"Female-headed households in Indonesia" (with Lina Marliani).

PUBLICATIONS

Papers

"Macroeconomic overview: Accelerating growth, maintaining stability". 2004. *Indonesian Quarterly* 32(3). (with Ari Perdana)
"Social implications of the Indonesian economic crisis." 2003. *Indonesian Quarterly* 31(2).
"Economic adjustment and the forestry sector in Indonesia." 2003. *Indonesian Quarterly* 31(2). (with Kurnya Roesad)
"Indonesia's labour market during the crisis: Empirical evidence from the Sakernas, 1997-1999". 2000. *Indonesian Quarterly* 28(3). (with Tubagus Feridhanusetyawan)
"Pendidikan di Indonesia sebelum dan semasa krisis" (Education in Indonesia before and during the crisis). *Analisis CSIS* 24(3). 2000.

Chapters

"Civil Service Reform in Boalemo District, Gorontalo Province." 2006. In Stefan Nachuk and Susannah Leisher (eds.), Making Services Work for the Poor: Nine Case Studies from Indonesia. Jakarta: World Bank.
"Healthcare Insurance Reform in Jembrana, Bali." (with Laila Kuznezov). In Nachuk and Leisher (op. cit.)
"Creating Learning Communities for Children in the Polman District, West Sulawesi." (with Nachuk, Leisher). In Nachuk and Leisher (op. cit.)
"Indonesia." 2005. In Southeast Asia Regional Outlook 2005-2006. Singapore: ISEAS.
"Indonesia." 2000. In *Confronting Climate Change: Economic Priorities and Climate Protection in Developing Nations*, Washington DC: National Environment Trust.

Reports

Village Capacity in Maintaining Infrastructure: Evidence from Rural Indonesia. 2010. Jakarta: World Bank.
Indonesia Commerce Report. 2007. New York: Economist Intelligence Unit.
GAM Reintegration Needs Assessment. 2006. Jakarta: World Bank. (with Patrick Barron, Samuel Clark, and Matthew Zurstrassen)

Op-eds/Book reviews

Articles for Indonesian national newspapers: *Kompas, Bisnis Indonesia* and *Jakarta Post*.

TEACHING EXPERIENCE

Teaching assistant

Evaluating social programs. MIT-JPAL/World Bank Jakarta Summer Course. (June 2008)
Economics of less developed countries. USC. (Fall 2009)
Economic development of the Middle East. USC. (Fall 2009)
Economic policy issues. USC. (Spring 2009)
Principles of microeconomics. USC. (Fall 2007, Spring & Fall 2008, Spring 2010)
Principles of macroeconomics. USC. (Fall 2009, Spring 2010)

Lecturer

Managerial Economics. Prasetiya Mulya Graduate School of Management, Jakarta, Indonesia. (Sep 2003 – May 2004)
Economics training for policy makers. Institute for Economics and Social Research. Faculty of Economics, University of Indonesia. *Occasional appointment*. (2005-2007)

RESEARCH AND WORK EXPERIENCE

Monitoring and evaluation consultant. *Social Development. World Bank, Jakarta Office, Jakarta* (Jul 2004 – Jul 2012).
Research Assistant. *Indonesian Family Life Survey.* (Summer 2008).
Freelance author, Economist Intelligence Unit, Ltd., London (Oct 2006 – Jan 2007).
Research economist, Centre for Strategic and International Studies, Jakarta (Feb 1997 – Jul 2007).
Researcher, *Pelangi Indonesia, Jakarta* (Jul 1997 – Oct 2000; Nov 2002 – Jan 2003).

SCHOLARSHIPS, FELLOWSHIPS AND AWARDS

2012-2013	USC Graduate School Dissertation Completion Fellowship.
2012	Student Fellow, Association for Analytical Learning about Islam and Muslim Societies.
2011-2012	Advanced Fellowship, USC Department of Economics.
2011	Summer Research Fellowship, USC Department of Economics.
2010	Best Third-Year Paper Award, USC Department of Economics.
2010-2011	Wallis Annenberg Fellowship for Research on Women and Family ($25,000).
2010-2012	American-Indonesian Cultural and Education Foundation Fellowship.
2007-2009	USC Teaching Assistant Awards.
2008-2009	Honorary mention for Teaching Excellence, USC Department of Economics
2002	Citibank Cambridge Scholarship.
2001	British Chevening Award.
1998	Visiting Fellow, Australian National University, Canberra.
1993	Student Achievement Award, De Anza College.

PROFESSIONAL ACTIVITIES

Lectures, conferences and seminars

(* *Invited presentations*)

2012:
Northeast Universities Development Consortium (NEUDC) at Dartmouth College;
Graduate Student Workshop, Institute for the Study of Religion, Economics, and Society (IRES) at Chapman University;
USC Development Economics Seminar;
Graduate Student Workshop, The Association for Analytic Learning on Islam and Muslim Societies (AALIMS) at Stanford University*;
Pacific Development Economics Conference at UC Davis;
Association of Religion, Economics and Culture Annual Meeting at Chapman University.

2011:
USC Experimental Laboratory Meeting;
Tanoto Foundation, Jakarta*.

2010:
Indonesian National Planning Agency, Jakarta;
Pacific Development Economics Conference, USC.

2006:
Atma-Jaya University, Yogyakarta*;

2003:
ASEAN-EC Management Institute, Brunei Darussalam*.

Referee. *ASEAN Economic Bulletin.*

Membership. *American Economic Association.*

THESIS ABSTRACT:

Part I: Uniter or Divider? Religion and Social Cooperation (Job Market Paper)

This study empirically investigates how religion correlates with particularized and generalized trust, as well as inter-group discrimination and tolerance. I combine the individual-level data of the latest round of the Indonesian Family Life Survey with the national census and other nationally representative datasets to examine two sources of variation through which religion may influence these attitudes, to wit, individual religiosity and the community's religious composition. The rich dataset allows for better identification of the religion effects on attitudes over previous studies. Moreover, this study contributes to the literature on the link between community heterogeneity and trust by highlighting the heterogeneous effects of diversity on intra- and inter-group trust, and providing empirical evidence on the important role of segregation on the propensity to cooperate.

Religiosity is positively associated with particularized trust and in-group preference, and negatively with religious tolerance. The strengths of the associations between measures of in-group preference and individual religiosity are much stronger than those from gender, education, or per-capita expenditure; they are also strongest among Muslims, the dominant majority in Indonesia. These associations are robust to various identification strategies. Following the strategy of Altonji (2005), I use selection on observables to benchmark the potential bias from selection on unobservables into different levels of religiosity. I find that the latter need to be at least almost three times stronger than the former to explain away these results.

Meanwhile, consistent with previous empirical studies in economics and political science, I find that individuals are more cooperative and trusting of their community members in more religiously homogeneous communities. At the same time – and in support of the optimal contact hypothesis of Gordon Allport (1954) – individuals in more homogeneous communities to be more discriminative against and less tolerant of members of the religious out-groups. Importantly, segregation matters and its omission can bias the coefficient on diversity. Its coefficients are often significant and their signs are often opposite those of religious diversity.

Part II: The Strategic Formation of Social Networks: Experimental Evidence (with Juan Carrillo)

The second part of my dissertation focuses on understanding how economic incentives can shape social networks – and hence, social cooperation. Recent theoretical work in economics begins to explore how networks are formed and the role of socio-economic incentives in shaping them (Bala and Goyal, 2000; Jackson and Wolinsky, 1996). In this study, we use a laboratory experiment to test a model of network formation where each link is formed through the bilateral agreement of the linked participants. We test whether the dynamic process of link creation and destruction given this particular link formation rule will converge to the pairwise-stable (PWS) network as predicted by the economic theory.

The analysis of network outcomes suggests that the process converges to the PWS network when a PWS network exists and not to converge to any net-work when a PWS network does not exist. When multiple Pareto-rankable PWS networks exist, subjects coordinate on the high-payoff one. The analysis at the single choice level indicates that the percentage of myopically rational

behavior is high. Deviations from myopic rationality are more prevalent in early turns, when marginal payoff losses are small and when deviations involve excessive links that may be removed unilaterally later on.
